2016 IHP+ MONITORING ROUND

National performance review

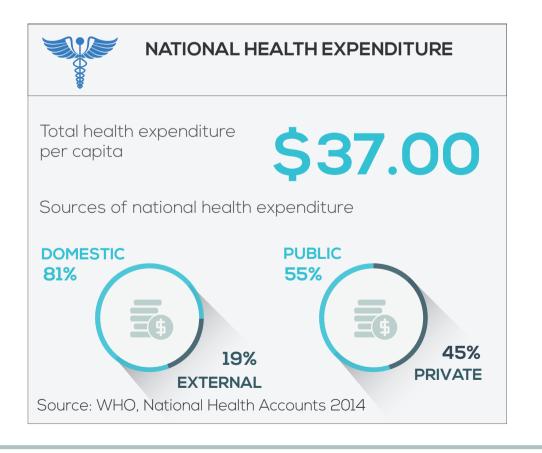

HOW TO READ THE COUNTRY PROFILE

All data presented on this visual aid are self-reported by the Ministry of Health (MoH), development partners (9 DPs out of 17 participated), civil society organisations (11 CSOs participated) and private sector representatives (6 PS participated) supporting the health sector. All data provided by DPs, CSOs and PS have in principle been validated by MoH.

The 8 Effective Development Cooperation (EDC) practices in health are captured in 4 commitments. The first three commitments present the performance of the government and DPs against 6 EDC practices. The last commitment also includes the opinion of the CSOs and PS on the EDC practices relevant to their engagement.

Where possible, trends in performance are documented over 4 monitoring rounds (2007, 2011, 2013 and 2015). When relevant, a comment relative to the EDC practice is provided in a text box.

For more detailed and disaggregated information on the data presented please visit www.internationalhealthpartnership.net/tchad.

PRIVATE SECTOR ENGAGEMENT

Lack of consultation framework between the MPH, DPs and private sector on Development Assistance.

The private for profit sector is not involved by the government and the DPs in their programming.

Private sector is complicated and needs structure.

IHP + little known by the private sector and even by CSO.

The sector (mainly for profit) receives virtually no technical or financial assistance from the government and the DPs.
