Summary of key points and conclusions

UHC2030 STEERING COMMITTEE MEETING

6/2018

Mobilizing High level political support

➢ Momentum of UHC2030's role in promoting UHC. Continue to seize opportunities at Global events to bring different stakeholder views.

➢ Defining what success looks like is crucial to help consolidate narrative for UHC2030

➢ Co-chairs letters to SG and UNGA President endorsed but modifications such being more explicit about the role UHC2030 can play in the preparation work.

➢ TORs for International UHC2030 Day Coordination Group and the Global Accountability Strategy Group endorsed.

Engaging with Low and Middle Income Countries

➢ Countries are the main clients of UHC2030 – more in-country engagement along with the global engagement needed to achieve impact

➢ Better awareness about UHC2030 at country level emphasized.

➢ EDC Agenda (coordination) still relevant in low income and lower middle income countries and therefore needs to maintained although the issues need to be reframed in the SDGs era

➢ Facilitating peer learning and knowledge exchange among countries

Related Initiatives and Networks Retreat

➢ Good basis for further elaboration on RI collaboration framework

➢ UHC2030's role as a broker of networks emphasized and should be further strengthened. Mapping of networks sponsors and countries where they are engaged recommended

➢ Reach beyond health systems initiatives – inclusiveness vs purpose

➢ Bring lessons learned from RIs to SC

Knowledge Management

➢ Knowledge management hub idea seen as one of the most valuable contributions UHC2030 could make towards UHC

➢ Country focused demand for knowledge emphasized

➢ Need to have a robust marketing strategy

➢ The need to avoid duplication and competition with existing networks and platform emphasized

➢ Keeping the scope of the hub as proposed- taxonomy, links to the knowledge of networks in the first phase

➢ Budget of KM approved

Health Data Collaborative Discussion

➢ HDC work on harmonizing data collection methods and indicators and strengthening country M&E systems remains crucial to UHC achievement

➢ Political support and implementation of country action however needs to be revitalized. Presentation to the GHAL leaders may help revive global level commitment the value of the HDC work

➢ HDC work could be a practical demonstration of how UHC2030 could engage in-country.

➢ Further discussion on how HDC work could be advanced is needed

Transition and sustainability discussion

➢ Strong support for the work done and suggestion to sharpen the message of what needs to be done differently to have more traction with political leaders

➢ Explicit reference to marginalised population

➢ Role of the group working forward vs the responsibility of UHC2030 members needs to be discussed

➢ Beyond the WHAT, importance of the HOW – usefulness of some kind of a framework/guidelines to guide the process of transition

➢ Process: finalize statement of principles within 3 months and development of an accompanying guiding technical note

Private Sector Discussion

➢ Start with one SC seat for PS, WEF nominated. Observers can be invited to SC meetings depending on the topic to be discussed

➢ Explore usefulness of a conflict of interest policy beyond adherence to FENSA. This will be applicable to all members, not only private sector

➢ Call for expressed to go forward. Observers can be invited to SC meetings depending on the topic to be discussed

➢ Consider adding PS beyond health in the second phase

➢ Consider setting up a separate WG to look at PS regulation issues

Budget

➢ Budget approved

Issues to consider

➢ Define the level of ambition from inputs received before fund raising

➢ Set up a SC level WG to discuss the options for fund raising

➢ Reaching out to potential DPs who are not included in the SC at the moment

➢ Consider allocating more to KM and Advocacy

➢ Need to lift up the profile of representation on the SC- Star power needed to tell success stories

➢ Consider raising UHC2030 issues at the GHLA meeting
