About Universal Health Coverage

Universal health coverage (UHC) ensures all people, everywhere, can access quality essential health services with financial protection. It is firmly rooted in the human right to health and requires strong political leadership. Because affordable, accessible, quality health services unlock people's potential, UHC is one of the smartest investments countries can make. And nearly all countries, including low-income countries, have the capacity to mobilise the resources required to achieve UHC. Achieving UHC is essential for inclusive development, prosperity, gender equality and fairness.

Despite clear benefits and feasibility, inequities in access to quality health services persist. Each year, over 800 million people spend at least ten percent of their household budgets on health-related costs, and about 100 million people are pushed into extreme poverty due to their health expenditures. Over 3.65 billion people, at least half of the world's population, does not have full coverage of essential services, and the most marginalised are left farthest behind.

UN High-Level Meeting on Universal Health Coverage

A United Nations High-Level Meeting (UN HLM) is convened by the UN General Assembly (UNGA), which represents all 193 UN Member States and is the main decision-making body of the UN. In this forum, Member States collaborate on an array of international issues covered by the UN Charter. Holding a dedicated UN HLM on a specialised topic is an exceptional circumstance created through a UN resolution, with the purpose of developing solutions to global issues among Heads of State and governments.

The UN HLM on UHC is the biggest and best opportunity to secure political commitment from Heads of State and Government to prioritise UHC. It will result in a Political Declaration on UHC, negotiated by Member States and endorsed by Heads of State. The Political Declaration will recognise the primary responsibility of governments to scale up global efforts to provide universal access to affordable and quality health services, in line with SDG target 3.8.

The President of the United Nations General Assembly (PGA) will organise a multi-stakeholder hearing on 29 April, 2019, at the UN General Assembly Hall, to allow non-state actors to formally contribute to the preparation of the UN HLM.

Key Asks from the UHC Movement for the UN HLM

Everyone, everywhere should have access to quality and affordable health services. We call on political leaders to legislate, invest and collaborate with all of society to make UHC a reality.

The Key Asks from the UHC Movement for the UN HLM (The UHC Key Asks) are a central document that UHC2030 has developed to help partners to influence the Political Declaration on UHC. They are the foundation for coordinated advocacy efforts and include milestones that all partners can promote in the lead up to the UN HLM.

The six Key Asks are:

- 1. Ensure Political Leadership Beyond Health** - Commit to achieve UHC for healthy lives and well-being for all at all stages, as a social contract.
- 2. Leave No One Behind** - Pursue equity in access to quality health services with financial protection.
- 3. Regulate and Legislate** - Create a strong, enabling regulatory and legal environment responsive to people's needs.
- 4. Uphold Quality of Care** - Build quality health systems that people and communities trust.
- 5. Invest More, Invest Better** - Sustain public financing and harmonise health investments.
- 6. Move Together** - Establish multi-stakeholder mechanisms for engaging the whole of society for a healthier world.

About UHC2030

UHC2030 is a movement for accelerating equitable and sustainable progress toward UHC by providing a multi-stakeholder platform that promotes collaboration at the global and country levels on health systems strengthening. We advocate for increased political commitment, facilitate accountability and promote knowledge sharing. UHC2030 has been asked to support the UN HLM with a focus on "sharing evidence and good practices, challenges and lessons learned."

Who is this toolkit for?

This toolkit is a campaign resource to help all partners in the UHC movement, whether government representatives, parliamentarians, academia, civil society or the private sector, advocate for a strong UN HLM Political Declaration that advances UHC at the community, regional, national and global levels. We encourage all partners to use the toolkit as a basis for coordinated advocacy efforts throughout the preparation of the UN HLM.
